EXPERIENCE

Senior Specialist
Operations Department
BROWN BROTHERS HARRIMAN
Apr 2020 - Jul 2024

- Handle fund mergers, transfers, and custodian migrations.
- Onboard new clients for security holdings transfers.
- Collaborate with sub-custodians to provide ongoing support and resolve issues.
- Participate in strategic meetings with internal and external parties.
- Enhance existing services and processes.
- Serve as a senior team member and mentor.

Blockchain Engineer
PIECES.MARKET
Jul 2024 - Present

- As a Blockchain Developer, I specialize in creating and maintaining decentralized applications and smart contracts using Solidity programming language. My expertise extends to backend development with Node.js and database management with MySQL, ensuring secure and efficient blockchain solutions.

FULL-STACK DEVELOPER

I've spent the past eight years mastering the finance industry. My interests in trading across diverse markets like stocks, crypto, futures, and more pushed me into learning programming so I could test and automate my trading ideas. The ability to check all my strategies and ideas very quickly using code made me love programming.

I have finally come to realize that blockchain is this great mix of finance, programming, and decentralization – a perfect fit for my skills and passions. That made me start learning more languages and frameworks that allowed me to create applications within web 3.0 from start to end. I'm currently applying my skills by fully committing to these new technologies and transitioning to a full-time role in full-stack development.

WORK EXPERIENCE

Trading Bots And Indicators Developer
Apr 2020 - Present

- Designing and programming complex trading expert advisors (trading robots), indicators and interfaces for forex platforms.
- Testing expert advisors and other tools.
- Optimizing trading robots.
- Improving the efficiency and profitability of robots.
- Deploying trading robots on live servers.

Web3 Full-Stack Developer
Mar 2022 - Present

- Designing and programming complex smart contracts.
- Designing and programming user interfaces for various DAPPS (Decentralized Applications).
- Optimizing gas costs for smart contracts.
- Testing the functionality and security of smart contracts.
- Actively contributing to the Web3 community.
- Serving as an advisor and mentor in blockchain courses.
- Conducting code reviews for internal teams.
- Coordinating work among internal teams.
- Identifying and resolving various project bugs and problems.

Most of my projects can be found on my
GitHub: <https://github.com/Niferu>

Courses

- Blockchain Development & Smart Contracts | Powered By AI And Foundry Full Course
- Blockchain, Solidity, Full Stack Web3 Development with JavaScript
- Solidity, Blockchain, and Smart Contract Course – Beginner to Expert Python
- Java From Beginner To Expert Course

LANGUAGES AND FRAMEWORKS

Solidity, Python, JavaScript, TypeScript, MQL5, Java, HTML, CSS, Tailwind, Framer Motion, NextJS, React, GraphQL, Apollo, Foundry, Hardhat, Brownie, Git, Bash, PowerShell, Makefile
